

## 2018 MIDLAND BULL TEST GROUP LEADERS

We are there! The results are in for the 56<sup>th</sup> Annual Midland Bull Test. Every year as this test culminates, consignors, buyers, and the team here at Midland are always anxious to see the results of the bulls on test. The progress that we continue to witness in this industry is phenomenal. The race to the top gets more and more competitive with each group of bulls that walk off the truck and down the alley at Midland. That being said we are excited to introduce “The Final Sort” Bull Sale April 5 & 6.

The Final Sort is exactly that – a FINAL SORT as we sort through the bulls again and again. Here lies the process that embodies the very purpose of Midland! Consignors send their top cut of bulls to Midland; we let them write their own stories! Their performance throughout the test determines whether they will clear hurdle after hurdle to be considered for the Final Sort Sale. The Williams and McDonnell families are honored to present a stellar group of bulls who come before you with enough data for you to visualize next year’s calf crop on the hoof! Midland strives to stay at the forefront of cattle data acquisition and analysis. Midland strives to gather more information, but also sets out with the purpose of understanding what that data means to producers in dollars and cents.

In this era of genomics and EPDs that we once only dreamed of, the amount of data available these days can be overwhelming. One thing remains the same however, *actual performance with measured efficiency is the true test of progress*. Producers must be careful of selecting for extremes without knowing the inputs required to maintain these cattle; input costs are going to be the deciding factor for the commercial cattleman in the coming years.

Midland strives to keep the commercial cattleman’s interest as a top priority when selecting criteria to publish. We use the economically relevant traits for the commercial cattleman in the overall MBT Index to determine the sale order. Midland is acutely conscious that dam and grand dam production records help the commercial cattleman to identify bulls derived from cattle who have stood the test of time.

As final numbers have been calculated and the test concluded, the results continue to evidence that a well-rounded prospect chases the lead time after time! We are excited to share and congratulate those leaders here at Midland Bull Test!

(Results below are as of 3-13-2018 and are pending all Breeding Soundness Exams).
