

MIDLAND
BULL TEST

APRIL 2-3, 2026 | COLUMBUS, MT

LEVEL UP

WITH BULLS FROM MIDLAND BULL TEST

since 1962...

Dear Fellow Cattlemen and Women

It is with great excitement we present this outstanding offering of bulls for your assessment. This sale would not be possible without the progress-oriented consignors that dare to see how their bulls stack up against others from across the nation. We commend the consignors for their dedication to improving the quality of bulls year in and year out by using the data to make improvements in their offering. There are very few bull sources with criteria evaluated by third parties. The bulls that rise to the top with these evaluations demonstrate great balance across an array of economically relevant traits important to everyone from the commercial cattleman to the feeder and even the consumer. You won't find an easier way to select for relevant balance than using the MBT Index to identify the cattle that excel in multiple traits across the board.

The calf market has been beyond incredible with the potential to continue for a few more years. Take this opportunity to position your cowherd with bulls that have the documented performance to propel your herd forward. In this era of chasing extreme EPDs and indexes, it is still essential to cover the bases and ensure the cattle have the appropriate foundation - body type, structure, length, capacity, and frame. Without this solid ground, the performance potential of the EPD won't be achieved.

Going through countless catalogs, I can't help but notice how many only list EPDs with no phenotypical data, no ratios or 205 weights. Midland has and will continue to maintain transparency by providing ALL THE DATA. Because every program is different, we believe in providing all the data to allow any buyer the opportunity to improve their program with a proven herd bull battery. Efficiency claims are abundant, but that term requires actual measurement. We do it with third party verification for accuracy. **Without measuring, we are only assuming.** The economic impact of feed efficiency is profound and has a large impact on the net income for the commercial cattleman, and the feedlot industry.

As you study the information in this catalog, if Leo, Steve, or Amy can be of any assistance, please let us know. We would be happy to answer any questions, elaborate on the measurements or help narrow down your selections. You are welcome to go through the bulls any time prior to the sale. Videos of the bulls will be available on our website. Sale day bulls will be on display prior to going through the ring. The sale will be broadcast live for online bidding if you aren't able to make it.

Steve, Amy and Midland Bull Test crew

...PROVIDING ALL THE DATA!

SALE INFORMATION

SALE ORDER: Determined by Midland Bull Test Index (1/4 ADG + 1/4 NR + 1/4 YR + 1/4 ER) and Estimated Sale Value. We do expect small changes in sale order. Be sure to check immediately prior to the sale for the most recent updates. Sale orders will be posted online and available sale day.

TERMS ARE CASH: All purchases need to be settled on the day of the sale. When making settlement, please leave specific instructions for transfer of registration, brand/health and shipping at checkout. Each animal will be sold to the highest bidder with the auctioneer settling any dispute as to bids.

Announcements made from the auction block take precedence over any printed material. Livestock will be cared for following the sale at the buyer's risk and responsibility.

CERTIFICATE OF REGISTRY: A transferred certificate of registry will be furnished to the Buyer for each animal after settlement has been made.

HEALTH: All cattle will be sold according to the health regulations of the State of Montana. Buyers must be aware of any variations between the laws of the states.

All bulls have tested BVD-PI negative and are tested negative for known genetic defects as detected by pedigree per respective Associations as of 3/1/25. Bulls sold into states that require trich test will be trich tested after sale and trucking arrangements will be made in short order.

CANADIAN BUYERS: Estimated health inspection costs for first bull purchase is \$775*. Each additional bull is \$300* per bull. Midland will split this cost equally with buyer for health inspection and testing. *Total subject to change. Balance due in full via wire or credit card before health testing will begin.

EFFICIENCY TEST: A collection of data that identifies ratio of the optimum balance between intake and gain. See page 12 for more information.

FERTILITY TESTED & GUARANTEED: Complete semen and scrotal evaluations on all bulls are performed by Lacey Farhmeier, DVM and Jesse Olsen, DVM, MS, both of Absarokee, MT. Scrotal measurements were taken in early March. All are published as actual size. For projected sale date size, add 1 to 1.5 cm per month. These bulls sell guaranteed to be breeders via natural service.

1/3 REVENUE SHARING SEMEN INTEREST:

Some breeders have elected to retain semen interest in their bulls. The buyer will have full possession and full salvage value. The seller, if he/ she desires to collect semen, will do so in the off-breeding season at the seller's expense and the buyer's convenience. If the buyer opts to participate in semen sales, then buyer and seller will work out a mutual agreement. Over the years it has been Midland's experience that most sellers do not exercise this option on bulls going into commercial herds.

DELIVERY: Cattle purchased in our sale will be delivered to CENTRAL locations, such as stockyards, in the lower 48 states. We will attempt to get bulls as close to you as possible. Drops will occur at central locations related to the majority needs for that particular load. Please see page 6 for our delivery policy, map and costs.

RISK: Everyone attending the sale does so at their own risk. The owners and Midland assume no liability, legal or otherwise, for any accidents which may occur.

SEMEN COLLECTION:

ORigen.....(406) 348-2345

World West.....(406) 628-7510

TERMS & CONDITIONS: All sales are being conducted under the American Angus Association Suggested Sale Terms and Conditions (6/04/2020) regardless of breed of sale bull. At Midland, we equally value and appreciate our consignors and buyers; and we are cognizant of the risk incurred by both. With a commitment to mitigate and minimize risk for both parties, **Midland has implemented a modified bull guarantee.** Mortality Insurance will be available sale day through Dakota AG Insurance, Jared Mohnen (605) 999-4475. Buyers who desire to guarantee bulls (insure), must initiate coverage at check-out following the sale. Midland Bull Test is offering to pay 50% of the cost of a 12 month policy covering Full Mortality. **The total cost of coverage is 8.5% of the purchase price, to be split between Midland Bull Test and the buyer (a minimum of \$250 premium: minimum \$125 to Midland, \$125 to buyer).** We think it is a very fair and complete coverage and it will be the only loss of use breeding guarantee offered by Midland Bull Test.

Dakota AG

INSURANCE

Livestock • Equine • Farm & Ranch • Crop • LRP • PRF

As a service to our valued customers,
Midland Bull Test will pay 50% of
the total premium on this 12-month
Individual Livestock Policy Coverage
Option from **Dakota Ag**
Insurance for the first year!

(You must elect to this policy on sale day to take advantage of
the 50% premium payment from
Midland Bull Test.)

Coverage: The coverage provides traditional, full mortality for death from natural causes or humane destruction as a result of a life-threatening injury.

Coverage Examples: Death for any reason, severe stifles, broken legs, severe foot rot and we have to euthanize the animal, severe sickness and we have to euthanize the animal or any other major injury where we have to euthanize the animal.

Indemnity/Payout: Pays **100%** of the value of the cow or bull in the event of death or humane destruction as a result of life-threatening injury.

Term: Renewable 1 year policy options available only.

Age: 91 days old to 6 years of age.

Rate: 8.5% annually. \$250 minimum premium applies to each policy.

Claims:

1. Claims must be reported to Dakota AG Insurance immediately following the discovery of the claim.
2. All mortality claims made to the company must have a veterinarian evaluation and will require a post mortem examination by a veterinarian.
3. Call Dakota AG Insurance immediately upon the discovery of the claim at (605) 990-5355 or 1-800-334-4525.

Our Sincerest **GRATITUDE:**

Thank you to our 2026 consignors for **LEVELING UP** the results of performance testing with top quality stock and thank you to our strong and dedicated buyers who continue to choose bulls backed by real measurement.

Our incredible **circle of friends and family** make this operation conceivable. We are truly grateful for their contributions of hard work, unique insights, and even the occasional bold reprimands needed to keep this train on the tracks! We have a lot of young new faces, and it's been a pleasure to see them grow through intense collaboration that comes with this role. The truth is no matter how much experience we have, no matter how much effort we put into being organized or how many people are here to help, there are always challenges, and turmoil that we must overcome, and doing it with a smile and sense of appreciation for the lessons is something that sets our crew apart.

We are so fortunate to work with our parents, **Leo & Sam and Jean**. They are incredibly talented, intelligent and giving in ways that we only hope to achieve as we travel through life.

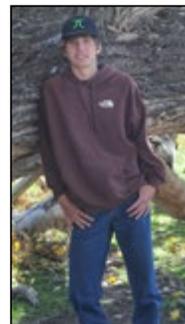

Matt and Lisa's long-term engagements continue to be so valuable, and we appreciate all the extra work this year helping to train up fresh faces. They remember all the things we sometimes forget. Their commitment to this team speaks volumes to their personal integrity.

Though **Rafe** is new at Midland, he is very familiar with Steve's pace and workload. He has known Steve for most of his life and together these two could tackle most anything. Rafe shows up every day with a positive outlook, and there is no job he views as too difficult. We are grateful to find someone like him, who is so consistent and so flexible.

Haley and Caitlin started just after the 2026 season began. They have both jumped into a lot of learning and have mastered each challenge with grace. We have been cross training them for inside and outside roles and it's a lot of responsibility. These girls show up ready for the load, and they make every job fun. We are proud of their growing confidence and look forward to their insights as they get more time under their belts.

As always, we receive a huge amount of support from our sale day crew and partners. It's amazing that so many extraordinary people dedicate their time to making the sale a success. Thank you for **LEVELING UP** our role, **Lacey and crew** from Stillwater Vet. **Tanner** for your long days clipping bulls, and **Samantha England** for the carcass ultrasound images. **Melissa** for your catering expertise and the Atlas Bar for hydrating us! And a huge thank you to **Strommen Livestock Services** for short notices, long nights and always **LEVELING UP** with something new!

GROUP#: Bulls are denoted as G1 (group 1) or G2 (group 2).

CLASS#: Breeds with more than 40 head on test will be indexed in two birth weight classes. Class 1 = low birth bulls. Class 2 = average/above average birth weight. The split will be determined by birth weight averages per breed and by EPDs as of Feb. 1

CONT#: Number of calves in this contemporary group within herd that are the same sex, managed alike and exposed to the same environment.

DOB: Birth Date

TATTOO: Ear Tattoo

REG#: Registration number given by respective Associations.

CAB: Meets the EPD requirement of +0.65 for Marbling and +55.0 for Dollar Grid Carcass Index (\$G) to be considered Certified Angus Beef.

ANGUS GS: Angus Genomic Selection. An advanced high density Genomic testing option, designed specifically for Angus cattle including potential markers for future trait selection.

HD50K: A genotyping platform that replaces i50K, designed specifically for Angus breeders. Delivers GE-EPDs, indexes, parentage verification and genomic percentile ranks

EPDs (EXPECTED PROGENY DIFFERENCE): The bull's pre-weaning growth. EPDs - The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. You cannot compare EPDs across breeds. Each breed association calculates that breed's EPDs. See breed averages below.

CE/CE: Calving Ease Direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BW: Birth Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WW: Weaning Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

MILK: Maternal Milk EPD is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

YW: Yearling Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires

HP: Heifer Pregnancy, expressed in percentage units, indicates the probability of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction

Other Production, Carcass and Ultrasound EPDs vary among the breeds, see below.

MARB: Intramuscular Fat EPD is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

REA: Ribeye area EPD is a predictor of the difference in square inches of ribeye area of a sire's progeny compared to the progeny of other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

FAT: Fat thickness EPD, expressed in inches, is a predictor of the difference in external fat thickness at the 12th rib of a sire's progeny compared to the progeny of other sires. It includes the weighted average of 60% of the rib fat measurement and 40% of the rump fat measurement. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

SW: Weaned Calf Value, an index expressed in dollars per head to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves.

SM: Maternal Weaned Calf Value, an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: CED, CEM, WW, Milk, HP, DOC, MCW, Claw and Angle.

SC: Combined Value, an index, expressed in dollars per head, which includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. EPDs directly influencing a combined index: CED, CEM, WW, YW, Milk, HP, DOC, MW, Angle, Claw, DMI, Marb., CW, RE and Fat.

PRE-TEST ANIMAL DATA:

BW: Actual Birth Weight

WW: Actual Weaning Weight

205 WT: Weaning Weight Adjusted to 205 Days.

NR: Nursing ratio, an index of the adjusted 205 day weight within the breeder's herd only. It is an indication of the dam's maternal performance and the bull's pre-weaning growth.

DAM PRODUCTION: Number of calves and average NR of those calves reported over dam's lifetime.

MGD PRODUCTION: Number of calves and average NR of those calves reported over granddam's lifetime.

FINAL TEST REPORT

ADG: Average Daily Gain.

ADG RAT: Average Daily Gain Ratio. 100 is average.

365 WT: Calculated using FBW and FBW date following BIF calculation guidelines.

YR/365R - Yearling ratio. Index of 365 Day Weights within class. 100 is average.

WDA - Actual Weight Per Day of Age (Lifetime ADG).

RFI - Residual Feed Intake. Actual feed intake minus expected feed intake. RFI is given here in the test data, complete efficiency test results are available at MidlandBullTest.

RFI EPD - (Vytelle EPD) Residual Feed Intake EPD, calculated for each individual animal based on their phenotypic RFI values and pedigree information. Lower RFI EPDs are more favorable.

DMI EPD - (Vytelle EPD) Dry Matter Intake EPD, calculated for each individual animal based on their phenotypic DMI values and pedigree information. Animals with lower DMI EPDs tend to eat less.

EFF RAT - Optimizes balance between performance and efficiency. It measures how efficiently the caloric content of feed is converted to pounds.

FINAL WT - Final Test Weight.

MBT IND: Combined ADG Ratio, Nursing ratio, Yearling ratio and Efficiency ratios (1/4 ADGR + 1/4 NR + 1/4 YR + 1/4 Efficiency Ratio)

SCR - Scrotal Circumference measured in centimeters by the veterinarian.

Watch the Sale on CCI.live!

The best, the fastest and most comprehensive marketing & bidding tool!

How to Bid Online...

As a buyer, you DO NOT need to login to watch the sale but you must have a validated account to bid.

To BID ONLINE go to www.CCI.live in your Chrome, Firefox, Safari or other modern browser:

- 1) Click on the sale schedule page.
- 2) Click on the sale of interest.
- 3) Click on Bid Online- Register and then Get Buyer Number

- After you are logged in, you must proceed to the sale page for your auction and click Bid Online - Register, then "Get Buyer Number." Some auctions require valid credit card number on file to obtain a buyer number to bid.

- CCI.live will operate with ease on a modern **cellular device, laptop, desktop or tablet.**
- A **current browser** is important and will always make your experience better.

- **For successful bidding you must have good Internet service!** It is very important to be stationary if bidding. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen, it is real time, and refresh your browser if you feel like you have some lag.

- **Support line open during all sales. TEXT 405-400-9505**
- Please alert the ranch for your hauling preferences.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the Certified Angus Beef® brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

For more information on Targeting the Brand™ visit CABcattle.com.

FEED SAVINGS ASSOCIATED WITH USING A LOW RFI BULL

INTRODUCTION

Feed costs can be as much as 70 percent of a beef producer's total production costs. Residual feed intake (RFI) is a measure of feed efficiency that explains the difference between what an animal is expected to eat and what they actually eat, for a given level of body weight, growth and production. Cattle with low RFI values are more efficient and eat less than expected while cattle with high RFI values are less efficient and eat more than expected. With its moderate heritability and independence of body weight and growth, selection for RFI can result in more feed efficient animals that require less feed while achieving the same level of production, growth and body composition. Testing and selecting cattle for RFI and using genetics from sires with low RFI expected progeny differences (EPDs) can result in significant feed savings over time. The scenarios below show the feed savings associated with using low RFI sires with varying RFI EPDs and expected breeding values (EBVs).

SCENARIO 1

A rancher purchased Bull 1 from a seedstock producer that had been selecting for RFI for 2 years. The rancher plans on using the bull for 4 years. Estimated feed savings over the 4-year period:

- Bull 1 RFI EBV = -0.08
- Bull 1 RFI EPD = -0.04
- Bred to average cows with RFI EBVs = 0
- Each year the bull sires 20 calves; 10 heifers and 10 bull calves
 - 7 of the heifers are kept as replacements
 - 13 calves are sent to the feedlot
- Feed cost = \$0.13/lb DM

With an RFI EBV of -0.08, Bull 1 will eat 0.08 lb DM/day less than the average bull. If the bull is bred to an average cow with an RFI EBV of 0, it's progeny will eat 0.04 lb DM/day (based on EPD) less than progeny from an inefficient or average RFI bull. This will equate to feed savings associated with maintaining the bull itself, as well as savings with feeding the replacement heifers and feedlot animals.

TABLE 1. FEED COST SAVINGS USING BULL 1 FOR 4 YEARS

	NUMBER OF ANIMALS	PER YEAR FEED COST (\$/LB DM)	REDUCTION IN FEED INTAKE (LB DM)	TOTAL SAVINGS (\$)
Maintaining Bull	1	0.13	117	15.18
Replacement Heifers	7	0.13	1,635	212.58
Feedlot Animals	13	0.13	468	60.84
Total Savings:				\$288.60

As seen in Table 1, over the 4-year period, Bull 1 will save the rancher \$288.60 in feed costs alone when compared to feed costs of an average bull. Savings in feed costs will continue to be increased if the rancher chooses to breed the replacement heifers with another low RFI bull. With several years of selection, the feed savings associated with a bull can be increased drastically, as shown below in Scenario 2.

SCENARIO 2

A rancher purchased Bull 2 from a seedstock producer that had been selecting for RFI for 15 years, hence the improvement in the RFI EPD (seen below). The rancher plans on using the bull for 4 years. Below you can see how much can be saved in feed costs over the 4-year period, given the following assumptions:

- Bull 2 RFI EBV = -1.0
- Bull 2 RFI EPD = -0.5
- Bred to average cows with RFI EBVs = 0
- Each year the bull sires 20 calves; 10 heifers and 10 bull calves
 - 7 of the heifers are kept as replacements
 - 13 calves are sent to the feedlot
- Feed cost = \$0.13/lb DM

With an RFI EBV of -1.0, Bull 2 will eat 1.0 lb DM/day less than the average bull. If the bull is bred to an average cow with an RFI EBV of 0, its progeny will eat 0.5 lb DM/day (based on EPD) less than progeny from an inefficient or average RFI bull. This will equate to feed savings associated with maintaining the bull itself, as well as savings with feeding the replacement heifers and feedlot animals.

TABLE 2. FEED COST SAVINGS USING BULL 2 FOR 4 YEARS				
	NUMBER OF ANIMALS	PER YEAR FEED COST (\$/LB DM)	REDUCTION IN FEED INTAKE (LB DM)	TOTAL SAVINGS (\$)
Maintaining Bull	1	0.13	1,460	189.90
Replacement Heifers	7	0.13	20,440	2,657.20
Feedlot Animals	13	0.13	5,850	760.50
Total Savings:				\$3,607.50

As seen in Table 2, over the 4-year period, Bull 2 will save the rancher \$3,607.50 in feed costs alone when compared to feed costs of an average bull. Again, the savings will continue to increase if the rancher chooses to breed the replacement heifers with another low RFI bull.

CONCLUSION

By selecting for RFI, or introducing several low RFI bulls into your herd, feed-related savings will continue to increase. Several years of genetic selection will improve the baseline feed efficiency of the ranch and savings will continue to transfer to the cow herd as replacement heifers are retained.

Angus Champion Pen of 3
SUNNY OKANOGAN ANGUS RANCH

Note: The awards presentation will be held prior to the sale of each breed.

MARY MCDONNELL VON FORELL SCHOLARSHIP

Each year we award one **Junior Consigner with the high performing bull from all breeds** with a \$500 scholarship from our family. This scholarship is named in remembrance of Mary, Steve's aunt and Leo's sister, who passed away from cancer. She is dearly missed. She was a huge supporter of youth.

Note: "High performing" is measured by top indexing bull over all breeds.

This Craftsman son should be extra stout out of our 3505 Renown donor cow. His 11-year old donor dam is still in production. Expect his daughters to be easy fleshing and improve udder quality. Flush mate to the 510 bull.

KYLE & THE WALK 'EM BOYS SHOBE

For the past two decades, Kyle Shobe and the Walk 'Em Boys have entertained crowds across the west with their unique brand of country music, born and bred in the middle of Montana. We are pleased to have Kyle join us as a featured entertainer Thursday, April 2, 2026, at the New Civic Center in Columbus, MT.

A seasoned recording artist, Shobe has released three studio albums, blending traditional country roots with his own Montana-inspired sound. As an auctioneer, rodeo announcer, and country music artist, Shobe's list of occupations is relatively diverse, but all of them circle back to a microphone and his ability to motivate, inspire, or otherwise persuade an audience.

Featured Entertainer **THURSDAY, APRIL 2**
 New Civic Center | Columbus, MT

5 p.m. Social • 6 p.m. Complementary Dinner
7-9 p.m. Live music from Kyle Shobe & The Walk 'Em Boys

Outstanding prospect for your cow herd. Good bull here with deep body and lots of performance. This guy will add quality pounds to the scale with his high marbling and his top 2% ribeye.

CORRECT FUNDAMENTALS

- Written by Clayton Jennings in 1964 and published in the Ankony Hyland catalog

“Some cattlemen either cannot or will not recognize correct fundamentals in an unfitted bull. **We have found that the time-tested successful commercial breeders are among the shrewdest judges in selecting great breeding bulls.** They can and will recognize correct fundamentals in a thin bull; and are willing to pay good prices. WHY? Through his years of successful operations, he has had lots of bull experience. He has bought fat bulls and watched those same bulls get thin. Sad and costly breeding experiences have been his best teacher. He has bought well-conditioned bulls and has been impressed with their development, liveability and breeding performance. **YES, THE PRACTICAL CATTLEMEN ARE LOOKING FOR AND DEMANDING THE VERY FUNDAMENTALS THAT HAS MADE THE ANGUS BREED THE GREATEST BEEF BREED IN THE WORLD.** They are looking for and demanding red meated, bully bulls, with lots of natural thickness throughout the barrel, great depth of body and good legs with plenty of the right kind of bone. **We believe he is entitled to these fundamentals.** He is willing to sacrifice on some other fundamentals if necessary. He is cautious and hard to fool on the fads and extremes that creep in and out of the breed. We need this kind of cattlemen and many more to fully develop the great potential of the expansion of Angus cattle.”

- Clayton Jennings, 1964

Standout Midland graduate that works in the McDonnell, Lucky 7, & Koupal's B&B Angus herds! This Heifer Bull Prospect offers a pedigree full of cow makers and has functional longevity built in his pedigree. His granddam produced until 14 years of age and his great-granddam until 16. Keep his daughters! • **Selling 2/3 Semen Interest and Full Possession**

Designed to be a cow maker! He stacks Logo on a Right Time daughter on the top and Resource on a Right Time daughter on the bottom. These cattle get the job done. His 11 year old maternal granddam is thriving and another AI calf at side. • **Selling 2/3 Semen Interest and Full Possession**

Recommended for cows. This bull is built to add pounds and enhance carcass value. Ranking in the top 15% for PAP EPD, he's a strong choice for programs focused on performance and longevity at elevation.

Agri Best Feeds

**JUST PENNIES A DAY
THROUGH YOUR TMR**

"The Redmond Conditioner has been an important addition in our feeding regimen at Midland Bull Test. With a broad range of backgrounds, we appreciate this well rounded and versatile product. It seems to have decreased the number of high sided cattle we see with feed transition."

-Steve Williams (Midland Bull Test)

- **Binds Toxins for Safer Digestion**
- **Buffers Rumen pH Levels**
- **Protects Against Bloat**
- **Improves Feed Efficiency**
- **Supports Gut Health**

Dakota AG

INSURANCE

Livestock • Equine • Farm & Ranch • Crop • LRP • PRF

Livestock Division:

- All Risk Mortality
 - Purebred/Seedstock Cattle
 - Bucking Bulls
 - Bison, Breeding Sheep, Goats & Swine
 - Working Dogs
 - Alpacas, Llamas & Exotics
- Livestock Confinement, Feedlot & Pasture
- Livestock Auction Markets, Packers & Stockyards
- Livestock Care Custody & Control
- Motor Truck Cargo
- Frozen Semen/Embryos stationary or in transit.

Equine Division:

- All Risk Mortality
- Stallion Infertility (ASD)
- Major Medical/Surgical Options
- Private Horse Owner's Liability Coverage

Farm & Ranch:

We insure all sizes of farm & ranch operations throughout the Midwest. We have access to every major carrier in the United States, don't hesitate to call an agent for a FREE-NO OBLIGATION quote today!

Crop / LRP & PRF Division:

- LRP offers protection against unexpected future declines in the market value of cattle & swine.
- PRF covers pasture, rangeland, or forage for perennial haying &/or grazing purposes. It's designed to help protect a producer's operation from the risks of forage loss due to the lack of precipitation.

Call an agent today to attend your annual production sale or to obtain a free, no obligation quote on all of your insurance needs!

TO DONATE

406-321-1497 - JOKER LEBRUN

BEARTOOTHSTOCKASSOCIATION@GMAIL.COM

FARM TO SCHOOL PROGRAM

The Beartooth Stock Association in partnership with local cattle producers support community needs. Producers may donate live beef animals, which are processed into ground beef for local schools. Since fall 2023, we have provided over 9,000 pounds of local beef to the school systems in Carbon and Stillwater Counties. This program relied on the generous donations of the following individuals and operations: Pine Coulee Bulls, Jess and Lynda Berg, Tyler and Jennifer Holzum, Guy Behrent, Terrill Ostrum, Jim Bill Anderson, Mo and Orsi Sowards, Les and Dawn Kraft, Noel and Penny Keogh, L Bar W Cattle Company, Bob and Kathy Kirch, John and Laurie Carrel, Chris and Sherri Arnold, and Doug and Sherry Moffett, and Carl DeVries. The outstanding community support has enabled 13 schools in the two counties to benefit from this initiative.
