WITH BULLS FROM MIDLAND BULL TEST

WE MEASURE FOR BALANCED PERFORMANCE

PERFORMANCE: Midland Bull Test bulls are developed on a high roughage ration to prove growth compatible with our current rangeland pastures. Midland is the only performance program to measure input and growth on this low energy ration. We take pride in offering bulls that are going to hold up working in the real world.

EFFICIENCY: Each animal is individually tested for RFI. Selecting cattle for improved feed efficiency can increase producer profitability by decreasing total feed costs without sacrificing pounds. We are proud to say our data is held to the highest standard and overseen by a third party, Vytelle, for additional accuracy.

PRODUCTIVITY: Fertility is the cornerstone of any program, and it is stressed at Midland with a thorough Breeding Soundness Evaluation (BSE) performed by a vet. Bulls must have a minimum scrotal circumference of 32cm, full extension, and adequate motility and morphology to pass evaluation. We understand a bull only makes half of your productive genetic potential, so we highlight the females behind these bulls by publishing 2 generations of dam production. The average nursing ratio at Midland is 106: proof of only the top weaning bull calves from the consigning herds.

CARCASS: Ultrasound is a great tool to improve the genetic merit of meat in demand. Each bull at Midland is ultrasounded for ribeye, backfat, and marbling. Utilizing ultrasound results in bull selections can improve heritable genetic traits to increase the end-product value for cattlemen and seed stock producers. This information is available online approximately the 3rd week of March.

At Midland Bull Test, you can shop with confidence. The bulls that make the Final Sort have passed multiple in-depth assessments to become part of our Final Sort line up. We have a consistent 60-year history of gathering and producing data, but Midland Bull Test is so much more than data. We are data, and we are function and type, we are fertility, health, structure, and feet. We are consistent, and we are evolving. We are history and advancements. We are intelligent and caring. We are quality and strength. We are balance. We have your back and your bottom line. We are family and friends. We value where we came from, and we want to improve what we leave behind. We too are cattlemen, and we are proud to be a piece of success for our partners, and to the world we feed. - Steve

INSIDE THIS REPORT

PRE-TEST PERFORMANCE

- DOB** - Birth Date
- BW** - Actual Birth Weight
- WW** - Actual Weaning Weight
- 205 WT** - Weaning Weight Adjusted to 205 Days.
- NR** - Nursing ratio, an index of the adjusted 205 day weight within the breeder's herd only. It is an indication of the dam's maternal performance and the bull's pre-weaning growth.
- CONT#** - Number of calves in this contemporary group within herd that are the same sex, managed alike and exposed to the same environment.

ON-TEST PERFORMANCE

- IBW** - Initial Body Weight- starting weight at Midland before going on test
- GROUP1 IBW DATE:** 10/06/2025
- IMBW1** - Intermediate Body Weight (~60d)
- GROUP 1 IMBW1 DATE:** 12/08/2025
- * Pending
